

GED Math Practice Test 11

PART A — QUESTIONS

GED-MATH11-001

Section: Math

Type: mcq

Category: Quantitative Problem Solving

Calculator: Non-Calculator

Prompt:

A clinic receives 4 boxes of gloves. Each box has 25 pairs of gloves. After 18 pairs are used, how many pairs remain?

- A) 72
- B) 82
- C) 92
- D) 118

GED-MATH11-002

Section: Math

Type: mcq

Category: Algebraic Problem Solving

Calculator: Non-Calculator

Prompt:

What is the value of $2x^2 + 3x$ when $x = 4$?

- A) 28
- B) 36
- C) 44
- D) 56

GED-MATH11-003

Section: Math

Type: mcq

Category: Quantitative Problem Solving

Calculator: Non-Calculator

Prompt:

A container is $\frac{2}{3}$ full. Then $\frac{1}{6}$ of the container is emptied. What fraction of the container is still full?

- A) $\frac{1}{2}$
- B) $\frac{2}{9}$
- C) $\frac{5}{6}$
- D) $\frac{1}{3}$

GED-MATH11-004

Section: Math

Type: mcq

Category: Algebraic Problem Solving

Calculator: Non-Calculator

Prompt:

Which expression is equivalent to $-3(2a - 5) + 4a$?

- A) $-2a + 15$
- B) $-2a - 15$

- C) $10a + 15$
D) $-10a + 15$

GED-MATH11-005

Section: Math

Type: mcq

Category: Quantitative Problem Solving

Calculator: Non-Calculator

Prompt:

A bag has 12 red clips, 8 blue clips, and 20 green clips. What percent of the clips are blue?

- A) 10%
B) 20%
C) 25%
D) 40%

GED-MATH11-006

Section: Math

Type: mcq

Category: Algebraic Problem Solving

Calculator: Calculator-Allowed

Prompt:

A formula used in a lab is $Q = 3(x - 4)^2$. If $Q = 75$, what is one possible value of x ?

- A) 1
B) 5
C) 9
D) 13

GED-MATH11-007

Section: Math

Type: numeric_entry

Category: Quantitative Problem Solving

Calculator: Calculator-Allowed

Prompt:

A shipping crate contains 16 cases. Each case has 18 bottles, and each bottle holds 0.75 liter. How many liters are in the crate?

Type your answer as an integer.

GED-MATH11-008

Section: Math

Type: dropdown

Category: Algebraic Problem Solving

Calculator: Calculator-Allowed

Prompt:

The formula $K = \frac{1}{2}mv^2$ gives kinetic energy K . To solve for m , first multiply both sides by [D1], then divide by [D2].

Dropdowns:

- D1) 2 | v^2 | $\frac{1}{2}$
D2) 2 | v^2 | K

GED-MATH11-009

Section: Math

Type: mcq

Category: Quantitative Problem Solving

Calculator: Calculator-Allowed

Prompt:

A tank contains 72 gallons of water. A pump removes 4.5 gallons per minute for 8 minutes. What percent of the original water remains in the tank?

- A) 25%
- B) 40%
- C) 50%
- D) 60%

GED-MATH11-010

Section: Math

Type: mcq

Category: Algebraic Problem Solving

Calculator: Calculator-Allowed

Prompt:

A number x satisfies $2(x + 6) > 34$. Which statement describes all possible values of x ?

- A) $x > 5$
- B) $x > 11$
- C) $x < 11$
- D) $x < 17$

GED-MATH11-011

Section: Math

Type: mcq

Category: Quantitative Problem Solving

Calculator: Calculator-Allowed

Prompt:

A table shows the number of meals prepared during three shifts.

Shift: Morning, Afternoon, Evening

Meals prepared: 108, 150, 168

Staff working: 6, 5, 8

Which shift had the greatest number of meals prepared per staff member?

- A) Morning
- B) Afternoon
- C) Evening
- D) All three shifts were equal

GED-MATH11-012

Section: Math

Type: multi_select

Category: Algebraic Problem Solving

Calculator: Calculator-Allowed

Prompt:

Select TWO answers.

Which expressions are equivalent to $5(2x - 7) + 3(x + 4)$?

- A) $13x - 23$
- B) $10x - 35 + 3x + 12$

- C) $13x - 47$
D) $5(2x) - 5(7) + 3x + 12$
E) $8(3x - 3)$

GED-MATH11-013

Section: Math

Type: mcq

Category: Quantitative Problem Solving

Calculator: Calculator-Allowed

Prompt:

A cafeteria tracks drink sales.

Drink: Water, Tea, Juice, Coffee

Number sold: 42, 35, 28, 55

If one sold drink is selected at random, what is the probability that it was either tea or juice?

- A) $7/20$
B) $21/80$
C) $63/160$
D) $3/5$

GED-MATH11-014

Section: Math

Type: numeric_entry

Category: Algebraic Problem Solving

Calculator: Calculator-Allowed

Prompt:

A formula for a delivery estimate is $T = 0.4m + 18$, where T is total time in minutes and m is distance in miles. If $T = 54$, what is m ?

Type your answer as an integer.

GED-MATH11-015

Section: Math

Type: mcq

Category: Quantitative Problem Solving

Calculator: Calculator-Allowed

Prompt:

A room is shaped like a rectangle with a small rectangular closet attached. The main room is 16 feet by 12 feet. The closet is 5 feet by 4 feet. What is the total floor area?

- A) 172 square feet
B) 192 square feet
C) 212 square feet
D) 272 square feet

GED-MATH11-016

Section: Math

Type: mcq

Category: Algebraic Problem Solving

Calculator: Calculator-Allowed

Prompt:

The table shows part of a linear relationship.

x: -3, 1, 5, 13
y: -20, -8, 4, 28

Which equation represents the relationship?

- A) $y = 2x - 14$
- B) $y = 3x - 11$
- C) $y = 4x - 8$
- D) $y = 6x - 2$

GED-MATH11-017

Section: Math

Type: multi_select

Category: Quantitative Problem Solving

Calculator: Calculator-Allowed

Prompt:

Select TWO answers.

The table compares two boxes of cereal.

Box: Small, Large

Weight: 14 oz, 22 oz

Price: \$4.06, \$5.94

Which statements are true?

- A) The small box costs \$0.29 per ounce.
- B) The large box costs \$0.27 per ounce.
- C) The small box has the lower unit price.
- D) The large box costs \$0.29 per ounce.
- E) The two boxes have the same unit price.

GED-MATH11-018

Section: Math

Type: mcq

Category: Algebraic Problem Solving

Calculator: Calculator-Allowed

Prompt:

Which inequality represents “the quotient of 40 and a number increased by 2 is less than 12”?

- A) $40/(x + 2) < 12$
- B) $40/x + 2 < 12$
- C) $x/40 + 2 < 12$
- D) $40/(x - 2) < 12$

GED-MATH11-019

Section: Math

Type: mcq

Category: Quantitative Problem Solving

Calculator: Calculator-Allowed

Prompt:

A wholesale item costs \$48. A store sells it for \$63.60. What is the markup as a percent of the wholesale cost?

- A) 24.5%
- B) 30%

- C) 32.5%
- D) 36%

GED-MATH11-020

Section: Math

Type: mcq

Category: Algebraic Problem Solving

Calculator: Calculator-Allowed

Prompt:

Solve for y : $5(y - 3) - 2(2y + 1) = 21$.

- A) 28
- B) 31
- C) 34
- D) 38

GED-MATH11-021

Section: Math

Type: mcq

Category: Quantitative Problem Solving

Calculator: Calculator-Allowed

Prompt:

A circular rug has a circumference of about 37.68 feet. Using $\pi \approx 3.14$, what is the radius of the rug?

- A) 3 feet
- B) 4 feet
- C) 6 feet
- D) 12 feet

GED-MATH11-022

Section: Math

Type: mcq

Category: Algebraic Problem Solving

Calculator: Calculator-Allowed

Prompt:

A line passes through the points $(-6, 5)$ and $(10, -3)$. What is the rate of change of the line?

- A) -2
- B) $-1/2$
- C) $1/2$
- D) 2

GED-MATH11-023

Section: Math

Type: mcq

Category: Quantitative Problem Solving

Calculator: Calculator-Allowed

Prompt:

A driver pays \$18.75 for 12.5 gallons of fuel during a promotion. The regular price is \$1.68 per gallon. How much money did the driver save compared with the regular price?

- A) \$1.25
- B) \$2.25

- C) \$2.75
- D) \$3.00

GED-MATH11-024

Section: Math

Type: mcq

Category: Algebraic Problem Solving

Calculator: Calculator-Allowed

Prompt:

Function A is represented by the table.

x: 0, 2, 6, 10
y: 30, 25, 15, 5

Function B is represented by $y = -2x + 18$. Which statement is true?

- A) Function A decreases by 2.5 for each 1-unit increase in x.
- B) Function B decreases faster than Function A.
- C) Function A has a positive rate of change.
- D) The two functions have the same y-intercept.

GED-MATH11-025

Section: Math

Type: numeric_entry

Category: Quantitative Problem Solving

Calculator: Calculator-Allowed

Prompt:

An employee's monthly evaluation score is based on 40% accuracy, 35% speed, and 25% attendance. The employee scores 91 for accuracy, 84 for speed, and 96 for attendance. What is the evaluation score?

Type your answer as a decimal rounded to the nearest tenth.

GED-MATH11-026

Section: Math

Type: mcq

Category: Algebraic Problem Solving

Calculator: Calculator-Allowed

Prompt:

A museum sold 120 tickets. Member tickets cost \$9, and nonmember tickets cost \$15. The total ticket revenue was \$1,512. Which system can be used to find m, the number of member tickets, and n, the number of nonmember tickets?

- A) $m + n = 1,512$
 $9m + 15n = 120$
- B) $m + n = 120$
 $9m + 15n = 1,512$
- C) $9m + 15n = 120$
 $m - n = 1,512$
- D) $15m + 9n = 120$
 $m + n = 1,512$

GED-MATH11-027

Section: Math

Type: mcq

Category: Quantitative Problem Solving

Calculator: Calculator-Allowed

Prompt:

A rectangular photo is 9 inches by 6 inches. It is reduced by a scale factor of $\frac{2}{3}$. What is the area of the reduced photo?

- A) 18 square inches
- B) 24 square inches
- C) 36 square inches
- D) 54 square inches

GED-MATH11-028

Section: Math

Type: dropdown

Category: Algebraic Problem Solving

Calculator: Calculator-Allowed

Prompt:

The equation $9x - 3y = 21$ can be rewritten as $y = [D1]x + [D2]$.

Dropdowns:

D1) 3 | -3 | $\frac{1}{3}$

D2) -7 | 7 | 21

GED-MATH11-029

Section: Math

Type: mcq

Category: Quantitative Problem Solving

Calculator: Calculator-Allowed

Prompt:

A box contains 6 blue tiles, 5 yellow tiles, and 9 white tiles. One tile is selected at random and not replaced. Then a second tile is selected. What is the probability that both tiles are yellow?

- A) $\frac{1}{19}$
- B) $\frac{1}{16}$
- C) $\frac{1}{10}$
- D) $\frac{1}{4}$

GED-MATH11-030

Section: Math

Type: multi_select

Category: Algebraic Problem Solving

Calculator: Calculator-Allowed

Prompt:

Select TWO answers.

The formula $S = 2lw + 2lh + 2wh$ gives the surface area S of a rectangular prism. Which equations correctly solve for h ?

- A) $h = (S - 2lw)/(2l + 2w)$
- B) $h = (S - 2lw)/(2(l + w))$
- C) $h = S - 2lw/(2l + 2w)$
- D) $h = S/(2l + 2w) - 2lw$
- E) $h = (S - 2l - 2w)/(2lw)$

GED-MATH11-031

Section: Math

Type: numeric_entry

Category: Quantitative Problem Solving

Calculator: Calculator-Allowed

Prompt:

A sample of liquid has a mass of 945 grams and a density of 1.35 grams per milliliter. What is the volume of the liquid in milliliters?

Type your answer as an integer.

GED-MATH11-032

Section: Math

Type: mcq

Category: Algebraic Problem Solving

Calculator: Calculator-Allowed

Prompt:

Solve for p: $4(3p + 2) - 5(p - 6) = 101$.

A) 7

B) 9

C) 11

D) 13

GED-MATH11-033

Section: Math

Type: mcq

Category: Quantitative Problem Solving

Calculator: Calculator-Allowed

Prompt:

A cone-shaped funnel has a diameter of 9 centimeters and a height of 12 centimeters. Using $\pi \approx 3.14$, what is the volume of the funnel?

Use $V = \frac{1}{3}\pi r^2 h$.

A) 127.17 cm^3

B) 254.34 cm^3

C) 508.68 cm^3

D) 763.02 cm^3

GED-MATH11-034

Section: Math

Type: mcq

Category: Algebraic Problem Solving

Calculator: Calculator-Allowed

Prompt:

The expression $x^2 - 12x + 35$ is equal to 0 for two values of x. Which value is one solution?

A) 3

B) 5

C) 12

D) 35

GED-MATH11-035

Section: Math

Type: mcq

Category: Algebraic Problem Solving

Calculator: Calculator-Allowed

Prompt:

The amount of medicine in a patient's bloodstream is modeled by $M = 80(0.65)^t$, where t is the number of hours after the dose. Which statement best describes the change each hour?

- A) The amount decreases by 35%.
- B) The amount decreases by 65%.
- C) The amount increases by 35%.
- D) The amount increases by 65%.

GED-MATH11-036

Section: Math

Type: mcq

Category: Quantitative Problem Solving

Calculator: Calculator-Allowed

Prompt:

A map scale says 5 centimeters represents 32 miles. A route is 12.5 centimeters long on the map. What is the actual length of the route?

- A) 64 miles
- B) 72 miles
- C) 80 miles
- D) 96 miles

GED-MATH11-037

Section: Math

Type: drag_drop

Category: Algebraic Problem Solving

Calculator: Calculator-Allowed

Prompt:

Match each target with the correct tile.

Tiles:

- A) $y = 4(x - 3) + 2$
- B) $y = 4x - 3 + 2$
- C) $y = 2(x - 3) + 4$
- D) $y = 4(x + 2) - 3$

Targets:

- T1) Subtract 3 from a number, multiply by 4, then add 2
- T2) Multiply a number by 4, subtract 3, then add 2
- T3) Add 2 to a number, multiply by 4, then subtract 3

GED-MATH11-038

Section: Math

Type: mcq

Category: Quantitative Problem Solving

Calculator: Calculator-Allowed

Prompt:

A machine fills 135 bottles in 18 minutes. At this rate, how many bottles will it fill in 44 minutes?

- A) 270
- B) 300
- C) 330
- D) 360

GED-MATH11-039

Section: Math

Type: mcq

Category: Algebraic Problem Solving

Calculator: Calculator-Allowed

Prompt:

A company has a budget of no more than \$1,250 for a training event. The room costs \$410, and each participant meal costs \$28. Which inequality can be used to find p , the number of participants the company can include?

A) $410 + 28p \leq 1,250$

B) $410 + 28p \geq 1,250$

C) $28 + 410p \leq 1,250$

D) $1,250 + 28p \leq 410$

GED-MATH11-040

Section: Math

Type: mcq

Category: Algebraic Problem Solving

Calculator: Calculator-Allowed

Prompt:

A savings balance is modeled by $B = 1,400(1.025)^t$. Which statement best describes the meaning of 1.025?

A) The balance increases by 2.5% each time period.

B) The balance decreases by 2.5% each time period.

C) The starting balance is \$1.025.

D) The balance increases by \$25 each time period.

GED-MATH11-041

Section: Math

Type: multi_select

Category: Quantitative Problem Solving

Calculator: Calculator-Allowed

Prompt:

Select TWO answers.

The table shows production data for two machines.

Machine: A, B

Operating time: 3.5 hr, 4.25 hr

Units produced: 252, 289

Which statements are true?

A) Machine A produced 72 units per hour.

B) Machine B produced 68 units per hour.

C) Machine B produced more units per hour than Machine A.

D) Machine A produced 68 units per hour.

E) The two machines had the same production rate.

GED-MATH11-042

Section: Math

Type: mcq

Category: Algebraic Problem Solving

Calculator: Calculator-Allowed

Prompt:

For the function $f(x) = -x^2 - 6x + 8$, what is $f(-5)$?

- A) -47
- B) -7
- C) 13
- D) 23

GED-MATH11-043

Section: Math

Type: mcq

Category: Algebraic Problem Solving

Calculator: Calculator-Allowed

Prompt:

The table shows a relationship.

x: -2, -1, 0, 1

y: 11, 6, 3, 2

Which statement best describes the relationship?

- A) It is linear because the x-values increase by 1.
- B) It is linear because the y-values decrease.
- C) It is not linear because the changes in y are not constant.
- D) It is not linear because some x-values are negative.

GED-MATH11-044

Section: Math

Type: mcq

Category: Algebraic Problem Solving

Calculator: Calculator-Allowed

Prompt:

Which expression represents 5 less than twice the difference of a number x and 9?

- A) $2x - 9 - 5$
- B) $2(x - 9) - 5$
- C) $5 - 2(x - 9)$
- D) $2(x + 9) - 5$

GED-MATH11-045

Section: Math

Type: numeric_entry

Category: Algebraic Problem Solving

Calculator: Calculator-Allowed

Prompt:

The formula $A = \frac{1}{2}(a + b)h$ gives the area of a trapezoid. If $A = 117$, $a = 11$, and $h = 9$, what is b?
Type your answer as an integer.

GED-MATH11-046

Section: Math

Type: mcq

Category: Quantitative Problem Solving

Calculator: Calculator-Allowed

Prompt:

A rectangular plaza is 40 feet long and 26 feet wide. A rectangular stage that is 18 feet by 10 feet is placed on the plaza, and the remaining area is left open. What area remains open?

- A) 180 square feet
- B) 680 square feet
- C) 860 square feet
- D) 1,040 square feet

PART B — ANSWER KEY + EXPLANATIONS

GED-MATH11-001 — Correct: B — Correct Answer: 82 — Explanation: The clinic receives $4 \times 25 = 100$ pairs. After 18 pairs are used, $100 - 18 = 82$ pairs remain.

GED-MATH11-002 — Correct: C — Correct Answer: 44 — Explanation: Substitute $x = 4$: $2(4^2) + 3(4) = 32 + 12 = 44$.

GED-MATH11-003 — Correct: A — Correct Answer: $\frac{1}{2}$ — Explanation: Subtract $\frac{1}{6}$ from $\frac{2}{3}$. Since $\frac{2}{3} = \frac{4}{6}$, $\frac{4}{6} - \frac{1}{6} = \frac{3}{6} = \frac{1}{2}$.

GED-MATH11-004 — Correct: A — Correct Answer: $-2a + 15$ — Explanation: $-3(2a - 5) + 4a = -6a + 15 + 4a = -2a + 15$.

GED-MATH11-005 — Correct: B — Correct Answer: 20% — Explanation: There are 40 clips total, and 8 are blue. Then $\frac{8}{40} = 0.20$, or 20%.

GED-MATH11-006 — Correct: C — Correct Answer: 9 — Explanation: $75 = 3(x - 4)^2$, so $25 = (x - 4)^2$. Then $x - 4 = 5$ gives $x = 9$.

GED-MATH11-007 — Correct: 216 — Tolerance: exact — Correct Answer: 216 — Explanation: The crate has $16 \times 18 = 288$ bottles. Each holds 0.75 liter, so the total is $288 \times 0.75 = 216$ liters.

GED-MATH11-008 — Correct: $D1=2$; $D2=v^2$ — Correct Answer: $D1=2$; $D2=v^2$ — Explanation: From $K = \frac{1}{2}mv^2$, multiply both sides by 2 to get $2K = mv^2$, then divide by v^2 .

GED-MATH11-009 — Correct: C — Correct Answer: 50% — Explanation: The pump removes $4.5 \times 8 = 36$ gallons. The tank has $72 - 36 = 36$ gallons left, which is $\frac{36}{72} = 50\%$.

GED-MATH11-010 — Correct: B — Correct Answer: $x > 11$ — Explanation: Divide $2(x + 6) > 34$ by 2 to get $x + 6 > 17$. Subtract 6 to get $x > 11$.

GED-MATH11-011 — Correct: B — Correct Answer: Afternoon — Explanation: Morning: $108 \div 6 = 18$ meals per staff member. Afternoon: $150 \div 5 = 30$. Evening: $168 \div 8 = 21$. The afternoon shift had the greatest number of meals per staff member.

GED-MATH11-012 — Correct: B,D — Correct Answer: $10x - 35 + 3x + 12 \mid 5(2x) - 5(7) + 3x + 12$ — Explanation: Both choices show correct distribution before combining like terms.

GED-MATH11-013 — Correct: C — Correct Answer: $\frac{63}{160}$ — Explanation: Total drinks sold: $42 + 35 + 28 + 55 = 160$. Tea or juice: $35 + 28 = 63$, so the probability is $\frac{63}{160}$.

GED-MATH11-014 — Correct: 90 — Tolerance: exact — Correct Answer: 90 — Explanation: $54 = 0.4m + 18$. Subtract 18 to get $36 = 0.4m$, so $m = 90$.

GED-MATH11-015 — Correct: C — Correct Answer: 212 square feet — Explanation: Main room area is $16 \times 12 = 192$. Closet area is $5 \times 4 = 20$. Total area is 212 square feet.

GED-MATH11-016 — Correct: B — Correct Answer: $y = 3x - 11$ — Explanation: When x increases by 4, y increases by 12, so the rate is 3. Substituting $x = 1$ and $y = -8$ gives $y = 3x - 11$.

GED-MATH11-017 — Correct: A,B — Correct Answer: The small box costs \$0.29 per ounce. | The large box costs \$0.27 per ounce. — Explanation: Small: $4.06 \div 14 = 0.29$. Large: $5.94 \div 22 = 0.27$.

GED-MATH11-018 — Correct: A — Correct Answer: $40/(x + 2) < 12$ — Explanation: “A number increased by 2” is $x + 2$, and the quotient of 40 and that expression is $40/(x + 2)$.

GED-MATH11-019 — Correct: C — Correct Answer: 32.5% — Explanation: Markup is $63.60 - 48 = 15.60$. Then $15.60 \div 48 = 0.325$, or 32.5%.

GED-MATH11-020 — Correct: D — Correct Answer: 38 — Explanation: $5(y - 3) - 2(2y + 1) = 5y - 15 - 4y - 2 = y - 17$. Then $y - 17 = 21$, so $y = 38$.

GED-MATH11-021 — Correct: C — Correct Answer: 6 feet — Explanation: Circumference $= 2\pi r$. So $37.68 = 2(3.14)r = 6.28r$, and $r = 6$.

GED-MATH11-022 — Correct: B — Correct Answer: $-1/2$ — Explanation: Rate of change $= (-3 - 5)/(10 - (-6)) = -8/16 = -1/2$.

GED-MATH11-023 — Correct: B — Correct Answer: \$2.25 — Explanation: Regular cost would be $12.5 \times 1.68 = \$21.00$. The driver paid \$18.75, so the savings were $\$21.00 - \$18.75 = \$2.25$.

GED-MATH11-024 — Correct: A — Correct Answer: Function A decreases by 2.5 for each 1-unit increase in x . — Explanation: From $x = 0$ to $x = 2$, y changes by -5 , so the rate is $-5/2 = -2.5$.

GED-MATH11-025 — Correct: 89.8 — Tolerance: exact — Correct Answer: 89.8 — Explanation: Evaluation score $= 0.40(91) + 0.35(84) + 0.25(96) = 36.4 + 29.4 + 24 = 89.8$.

GED-MATH11-026 — Correct: B — Correct Answer: $m + n = 120$
 $9m + 15n = 1,512$ — Explanation: The first equation represents the total number of tickets, and the second represents total revenue.

GED-MATH11-027 — Correct: B — Correct Answer: 24 square inches — Explanation: The original area is $9 \times 6 = 54$. A scale factor of $2/3$ changes area by $(2/3)^2 = 4/9$. Then $54 \times 4/9 = 24$.

GED-MATH11-028 — Correct: D1=3; D2=-7 — Correct Answer: D1=3; D2=-7 — Explanation: $9x - 3y = 21$ gives $-3y = -9x + 21$, so $y = 3x - 7$.

GED-MATH11-029 — Correct: A — Correct Answer: $1/19$ — Explanation: There are 20 tiles total and 5 are yellow. Without replacement, $P(\text{two yellow}) = 5/20 \times 4/19 = 1/19$.

GED-MATH11-030 — Correct: A,B — Correct Answer: $h = (S - 2lw)/(2l + 2w)$ | $h = (S - 2lw)/(2(l + w))$ — Explanation: From $S = 2lw + 2lh + 2wh$, subtract $2lw$ to get $S - 2lw = h(2l + 2w)$, then divide by $2l + 2w$.

GED-MATH11-031 — Correct: 700 — Tolerance: exact — Correct Answer: 700 — Explanation: Volume = mass $\div$ density = $945 \div 1.35 = 700$ milliliters.

GED-MATH11-032 — Correct: B — Correct Answer: 9 — Explanation: $4(3p + 2) - 5(p - 6) = 12p + 8 - 5p + 30 = 7p + 38$. Then $7p + 38 = 101$, so $p = 9$.

GED-MATH11-033 — Correct: B — Correct Answer: 254.34 cm^3 — Explanation: The radius is 4.5 cm. $V = \frac{1}{3}(3.14)(4.5^2)(12) = 254.34 \text{ cm}^3$.

GED-MATH11-034 — Correct: B — Correct Answer: 5 — Explanation: $x^2 - 12x + 35$ factors as $(x - 5)(x - 7)$, so $x = 5$ is one solution.

GED-MATH11-035 — Correct: A — Correct Answer: The amount decreases by 35%. — Explanation: Multiplying by 0.65 means 65% remains each hour, so the decrease is 35%.

GED-MATH11-036 — Correct: C — Correct Answer: 80 miles — Explanation: The scale is $32 \div 5 = 6.4$ miles per centimeter. Then $12.5 \times 6.4 = 80$ miles.

GED-MATH11-037 — Correct: T1=A; T2=B; T3=D — Correct Answer: T1=y = $4(x - 3) + 2$; T2=y = $4x - 3 + 2$; T3=y = $4(x + 2) - 3$ — Explanation: Each tile matches the order of operations described.

GED-MATH11-038 — Correct: C — Correct Answer: 330 — Explanation: The rate is $135 \div 18 = 7.5$ bottles per minute. In 44 minutes, it fills $7.5 \times 44 = 330$ bottles.

GED-MATH11-039 — Correct: A — Correct Answer: $410 + 28p \leq 1,250$ — Explanation: The total cost is the room cost plus \$28 per participant, and the budget is no more than \$1,250.

GED-MATH11-040 — Correct: A — Correct Answer: The balance increases by 2.5% each time period. — Explanation: Multiplying by 1.025 means the balance keeps 100% and increases by 2.5%.

GED-MATH11-041 — Correct: A,B — Correct Answer: Machine A produced 72 units per hour. | Machine B produced 68 units per hour. — Explanation: Machine A: $252 \div 3.5 = 72$. Machine B: $289 \div 4.25 = 68$.

GED-MATH11-042 — Correct: C — Correct Answer: 13 — Explanation: $f(-5) = -(-5)^2 - 6(-5) + 8 = -25 + 30 + 8 = 13$.

GED-MATH11-043 — Correct: C — Correct Answer: It is not linear because the changes in y are not constant. — Explanation: The changes in y are -5 , -3 , and -1 , so the rate of change is not constant.

GED-MATH11-044 — Correct: B — Correct Answer: $2(x - 9) - 5$ — Explanation: The difference of x and 9 is $x - 9$. Twice that difference is $2(x - 9)$, and 5 less than that is $2(x - 9) - 5$.

GED-MATH11-045 — Correct: 15 — Tolerance: exact — Correct Answer: 15 — Explanation: $117 = \frac{1}{2}(11 + b)(9)$, so $117 = 4.5(11 + b)$. Then $26 = 11 + b$, so $b = 15$.

GED-MATH11-046 — Correct: C — Correct Answer: 860 square feet — Explanation: Plaza area is $40 \times 26 = 1,040$. Stage area is $18 \times 10 = 180$. Open area is $1,040 - 180 = 860$ square feet.
